

FINALLY PERMANENT HEMORRHOID TREATMENT...
FDA APPROVED. PAIN-FREE.

Get **RELIEF**

YOU ARE NOT ALONE IN YOUR **SUFFERING**

Hemorrhoids are common in both men and women and affect about 1 in 20 Americans.

According to the National Institute of Health, **half of all adults** between 50 and 70 suffer from hemorrhoids.

<https://www.niddk.nih.gov/health-information/digestive-diseases/hemorrhoids>

CURRENT TREATMENTS **CARRY RISK**

What's at stake?

Other procedures have limited applications and increased risk and complications.

Almost 10% of other treatments have caused significant complications, even death.

Other procedures may be temporary.

Left untreated...

- Bleeding or Blood Clotting
- Relentless Itching or Burning
- Can Lead to Gangrene or Sepsis
- Painful Skin Tags
- Strangulated Hemorrhoids
- Can overshadow or disguise other conditions such as colon cancer, Crohn's Disease, and Ulcerative Colitis

WHY IS **BANDING** INFERIOR?

Banding only treats prolapsed grade 1 and 2 hemorrhoids. Additionally:

- Most patients will require 3-4 sessions in 2-week intervals.
- Patients will feel pain and discomfort for several days.
- Patients will need recovery time away from work

But there is a **better** way...

GET YOUR **LIFE BACK**

Pain-free.

Finally, a simple, permanent, and patented painless process.

Fast.

No more home remedies, awkward appointments, and painful surgeries with lengthy recovery times. You can return to work immediately.

Doctor Preferred.

HemWell is breakthrough FDA approved technology, and we have actual patient and doctor testimonies from all over the country.

THE **SCIENCE** BEHIND HEMWELL

How does the HemWell Procedure work?

A doctor holds a low level direct current probe against the hemorrhoid base, with no tissue penetration. This causes a chemical reaction in the hemorrhoid, triggering ligation within the vascular feeding vessels.

The hemorrhoid begins to shrink immediately during the procedure, continuing for 7 to 10 days. As the hemorrhoid shrinks, symptoms are relieved and relief often begins immediately after the first procedure. The number and extent of procedures are determined by number and severity of the patient's hemorrhoids. The HemWell Procedure is:

- Non-Surgical
- Treats all four grades of internal or mixed hemorrhoids
- Has minimal discomfort using a safe 5-15 minute procedure
- FDA cleared and patented
- CE and N.I.C.E approved
- Has full insurance reimbursement

The results are **transformative.**

HEMWELL CAN HELP

Here at HemWell, we knew that people needed a more compassionate, advanced treatment option in a clinical setting that would fully heal a person suffering from hemorrhoids.

We know hemorrhoids are embarrassing, painful, and time-consuming.

Eight out of ten people suffer from hemorrhoid symptoms sometime in their lives.

120,000 treatments were performed with ZERO known issues.

Unlike other treatments that burn, puncture, or scar the vein, HemWell works naturally and is non-invasive.
